

TIME MACHINE  
Year 1 Autumn Term 1

Our topic this half term is...

# TIME MACHINE

Our work will be centered around different periods throughout time. We will research how our world has changed, looking into food, clothes, famous people, landscape, school life, houses, entertainment and so much more!

This topic will have a History focus, however we will use this focus to make cross curricular links with Literacy, Maths, Science, DT, Music, Art, PE and Geography.

In Year One, alongside our weekly Maths, spellings and reading homework, we also set an optional homework task each half term. This will always be open-ended and designed to encourage the children to create something individual that we can then share and celebrate in school together.

Our homework task for this half term will involve researching a famous person or event in history and presenting the information found in a creative way. The things discovered can then be presented however they choose, for example through a picture, song, poem, story, model etc. The more creative the better! This task can be extended at home into other areas of History if they wish, the more information we can share with each other the better!

If you have any questions, ideas to share or would just like a chat, I am always available after school.

Here's to a magical first half term of learning!

Mrs. Thirsk 😊
