

Literacy

We will be developing skills in writing, focusing on sentence structure, grammar and handwriting.

We can then apply this knowledge to our story writing. Our focus will be on retelling stories and story language along with describing characters, events and settings. We will undertake drama activities. In reading the children will develop their comprehension skills and application of phonic knowledge.

Maths

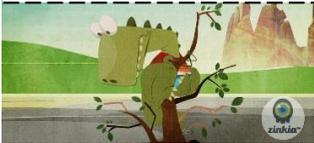

This term we will be exploring number and number system. We will be looking at place value and counting in multiples of 2,5 and 10. We will be learning about rounding numbers and estimating. We will also be developing time telling skills and aiming to use mathematical vocabulary correctly.

Science

We will be learning about materials, types of materials, natural/man made, what things are made from, properties and investigations.

P.E

Year 2 will focus on movement, rhythm and balance in dance this half term. They will have chance to learn, practice and choreograph some of their own dance moves to create a simple sequence. Linked to PSHE, the children will consider how their bodies change during and after exercise.

Make Believe Year 2 Autumn Term 1

Geography/History

The children will be learning the continents and oceans. Climates from around the world. The local area compared with other locations. The lives of significant individuals in the past. Our royal family. Significant historical events.

Art /Design and Technology/ Computing

Year 2 will be developing their sketching skills with a variety of different media and how to use these materials correctly and safely. We will also be looking at the work of influential artists to enhance our topic theme. To use the iPads to look up different information, developing mouse skills and designing props. The children will be learning how to both cut and join materials for a range of props and settings for our production.
